

# Standard Accounts

Standard Accounts by HansaWorld begins as an easy to use invoicing application for small businesses across all industries. Developed by the award winning software house HansaWorld, the program constitutes the first building block of your business software, with the possibility to grow as your company expands.

Within minutes of installing Standard Accounts, you will have entered your first customers and items and will be printing invoices. To help you monitor your business, the program contains many useful reports, giving in-depth analysis of your sales, purchasing and bookkeeping. If you should require assistance with the software, there are over 100 eLearning videos that will support you

Standard Accounts is the only software in this segment offering a native solution that can be used on computers with Windows or Mac OSX as well as on tablets and smartphones with Android, iOS or Windows 8, thereby giving you a truly flexible solution where you decide what to use and only pay for the features that you actually need.

through every aspect of using Standard Accounts, from initial setup through day to day data entry and reporting. Also you can refer to a database of questions and answers on our website, plus there is an extensive forum in place to help you.

To get even more from your software, Standard Accounts has a built-in Marketplace that offers you the possibility to add functionality, changing the invoicing software to a complete, integrated, business software. Use the Marketplace to add Accounts Payables and General Ledger to have a complete bookkeeping solution, or go further and add quotations, orders and stock management for a full scale solution.

Should your business needs change, you can upgrade within the same product family ranging all the way to Enterprise by HansaWorld, a full featured, multi-platform application containing Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), E-commerce and a long list of industry specific solutions.
